**WrapSHIELD®**

PROJECT DESCRIPTION

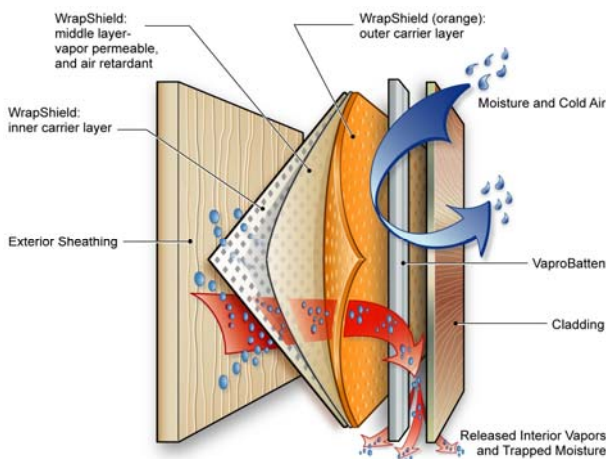

Over 90,000 sq. ft of VaproShield WrapShield was installed at the luxury Tulalip casino hotel. With a rating of 50 perms, WrapShield combines the best properties of a vapor permeable membrane and an air barrier in one innovative, affordable product.

The \$131M, 12 story, 370 guest room luxury hotel includes banquet space, conference center, luxury suites, guest rooms, multiple restaurants, and a pool/spa. The hotel was completed and opened in 2008. The hotel joins the \$78M Tulalip casino which opened in 2003. This makes Tulalip the largest meeting, gaming, entertainment and shopping destination in Washington State.

VaproShield offers specific installation fastener spacings for WrapShield for buildings between 70 to 625 feet in height, differentiated by exposure, building category, fixing types and wind speeds.

Over 90,000 sq. ft. WrapShield was used on the Tulalip hotel.

WrapShield membrane construction showing the middle layer as vapor permeable and air retardant. .
